Full-Stack Software Engineer with 5 Years Development Experience

I am a full-stack software engineer who loves solving problems and making software to help people. I fell in love with coding by working full-time in website development and management for the last 5 years. I have enhanced my hands-on development experience with formal education in software engineering & computer science to be a well-rounded engineer.

Relevant Skills

Javascript | React | React Native | HTML | CSS | PHP | MongoDB | Express | Node.js | Java | Spring | Python | AWS

Technical Projects
