Full-Stack Software Engineer with 5 Years Development Experience

I fell in love with coding through web development, working professionally on websites for the last 5 years. Through my work experience, formal education, and self-study I've expanded my skills to include a wide range of programming languages and technologies. My career goal is to become a full-time software engineer on a team where I can contribute my problem-solving and leadership skills. In my free time, I enjoy working on children's educational apps for my business.

Skills

HTML | CSS | Javascript | PHP | MongoDB | Express | React | React Native | Node.js | Java | Spring | Python | AWS

Technical Projects

Watermark Website   September 2020 - Present
- Business website that I manage. I lead a team in all areas of the website and contribute to development on it.

My Shopping Pal   August 20 - 30, 2022
- Full-stack, MVC, CRUD web app with users, sessions, and encryption, to make your own personal shopping list.

DBZ World Tournament   July 12 - 22, 2022
- Two-player fighting game utilizing DOM, classes, and flexbox with options for audio and character customization.
